

I have summarize the entire PDF into a set of requirements. Please review and confirm if anything has been inadvertently omitted. We will treat this document as our official requirement guide, and our focus will strictly be on fulfilling these outlined requirements. Any additional requirement will be addressed through separate discussions.

1. Buy It Now Listings:

- Sellers can choose between auction and buy it now listings.
- Buy it now items have different options as compare to listing.
- Buy it now items have options for pricing and quantity.
- items can be listed in quantity for sale.
- Example: seller is selling 46 Fishing bags and user can buy as many as he want.

2. Multiple Item Purchase:

- Custom field needed to buy more than one item at once.

3. Improved Listing Page:

- Show item cost, available quantity, and total order value.
- Option to input quantity for multiple item purchase.
- Price will be calculated with respect to the number of items purchased.
- Update available quantity after sale completion.

4. Payment Gateway:

- Current theme has various payment options.
- Preference for PayPal due to buyer protection.
- Seeking a cheaper method for collecting commissions.

5. Current Functionality:

- Theme calculates commission and creates invoices.
- Invoice includes "Pay Now" option via PayPal.
- Seeking automation of payment collection.

- Alternatives like Stripe for commission payments.

6. Automation of Commission Payment:

- Exploring automation options based on threshold or schedule. For example: Automatically deduct £10 from the seller's account when the commission exceeds £10 or automatically deduct amount at the end of the month.
- Avoid reliance solely on PayPal for commission collection.
- Consider alternative methods like Stripe.
